

opsCTRL

**Where data meets decisions**

# Agenda

## 1 — Intelligent Operations Platform

## 2 — What is opsCTRL

- Benefits to Facilities
- Benefits to Suppliers
- Key Features

## 3 — Implementation Process

## 4 — About inCTRL Solutions

# Intelligent Operations Platform

# Intelligent Operations Platform

**An Intelligent Operations Platform (IOP) unifies data from diverse sources and transforms it into actionable intelligence, empowering teams to make informed decisions with confidence.**

By enabling efficient operations and streamlined workflows, the IOP drives optimized plant performance and sustainable success.

# Intelligent Operations Platform

## KEY BENEFITS

Centralizes information into one accessible platform, bridging the gap between operators, managers, and executives.

Enables real-time monitoring, advanced analytics, and seamless collaboration.

Drives efficiency, supports informed decision-making, and unlocks the full potential of operations.

# How an IOP Works

1

## DATA INFLOWS

**Gathering data from every corner of your operations**

- Sensors
- Manual Inputs
- External Systems (APIs)
- Historical Data
- Lab Data

2

## THE PLATFORM (IOP)

**Turning raw data into clear, actionable insights**

- Analyze
- Aggregate
- Contextualize
- Transform

3

## ACTIONABLE INSIGHTS

**Insights for smarter, faster decisions at every level**

- **Operators:** Focused on day-to-day tactical actions.
- **Managers:** Focused on operational efficiency and mid-term plans.
- **Executives:** Focused on strategic, long-term goals.

# opsCTRL Facility

## The Intelligent Operations Platform for Water, Wastewater, & Biogas Facilities

1

### DATA SOURCES

**opsCTRL centralizes all your plant data into one powerful platform**

- **Lab Data** (e.g., water quality analysis)
- **Sensor Data** (e.g., flow meters, pressure monitors)
- **Manual Inputs** (e.g., operator logs, maintenance records)
- **APIs** (e.g., external software integrations)
- **IOT data** (machine data)

2

### THE opsCTRL PLATFORM

**opsCTRL transforms raw data into actionable insights by combining machine learning with standard water best-practices**

- Data Management
- Analytics & Insights
- Monitoring & Alerts
- Predictive Maintenance
- Actionable Recommendations

3

### END USERS & BENEFITS

**opsCTRL aligns your organization with one source of truth, empowering data-driven decisions at every level**

- **Operators (Day-to-Day Tactical Decisions):** Real-time monitoring, immediate alerts, and visual dashboards for streamlined operations.
- **Managers (1-Year Planning):** Tools for efficiency, predictive maintenance, and data-driven resource allocation.
- **Directors (10-Year Strategic Planning):** Long-term trend analysis, sustainability insights, and regulatory support.

**When operations are in control and teams are aligned, performance improves confidently at every level**

# opsCTRL Supplier

## The Intelligent Operations Platform for Water and Wastewater Suppliers

1

2

3

### DATA SOURCES

**opsCTRL centralizes all your plant data into one powerful platform**

- **Lab Data** (e.g., water quality analysis)
- **Sensor Data** (e.g., flow meters, pressure monitors)
- **Manual Inputs** (e.g., operator logs, maintenance records)
- **APIs** (e.g., external software integrations)

### THE opsCTRL PLATFORM

**opsCTRL transforms raw data into actionable insights using advanced analytics and industry-specific tools**

- Data Management
- Analytics & Insights
- Monitoring & Alerts
- Predictive Maintenance
- Actionable Recommendations

### END USERS & BENEFITS

**opsCTRL enables a product and service company to grow by increasing customer success through data excellence**

- **Process Engineer (Supporting Customers):** Centralized monitoring and reduced warranty activity.
- **Service Manager (Increase Profit):** Cost-efficient service models and on-site oversight to maintain treatment capability.
- **Sales and Product (Increase Market Size):** Proactive selling via install base insights, data-driven product improvements, and stronger customer relationships.

**When customers operate their plants effectively, business opportunities grow, performance improves, and everyone wins.**

# What is opsCTRL?

# What is opsCTRL?

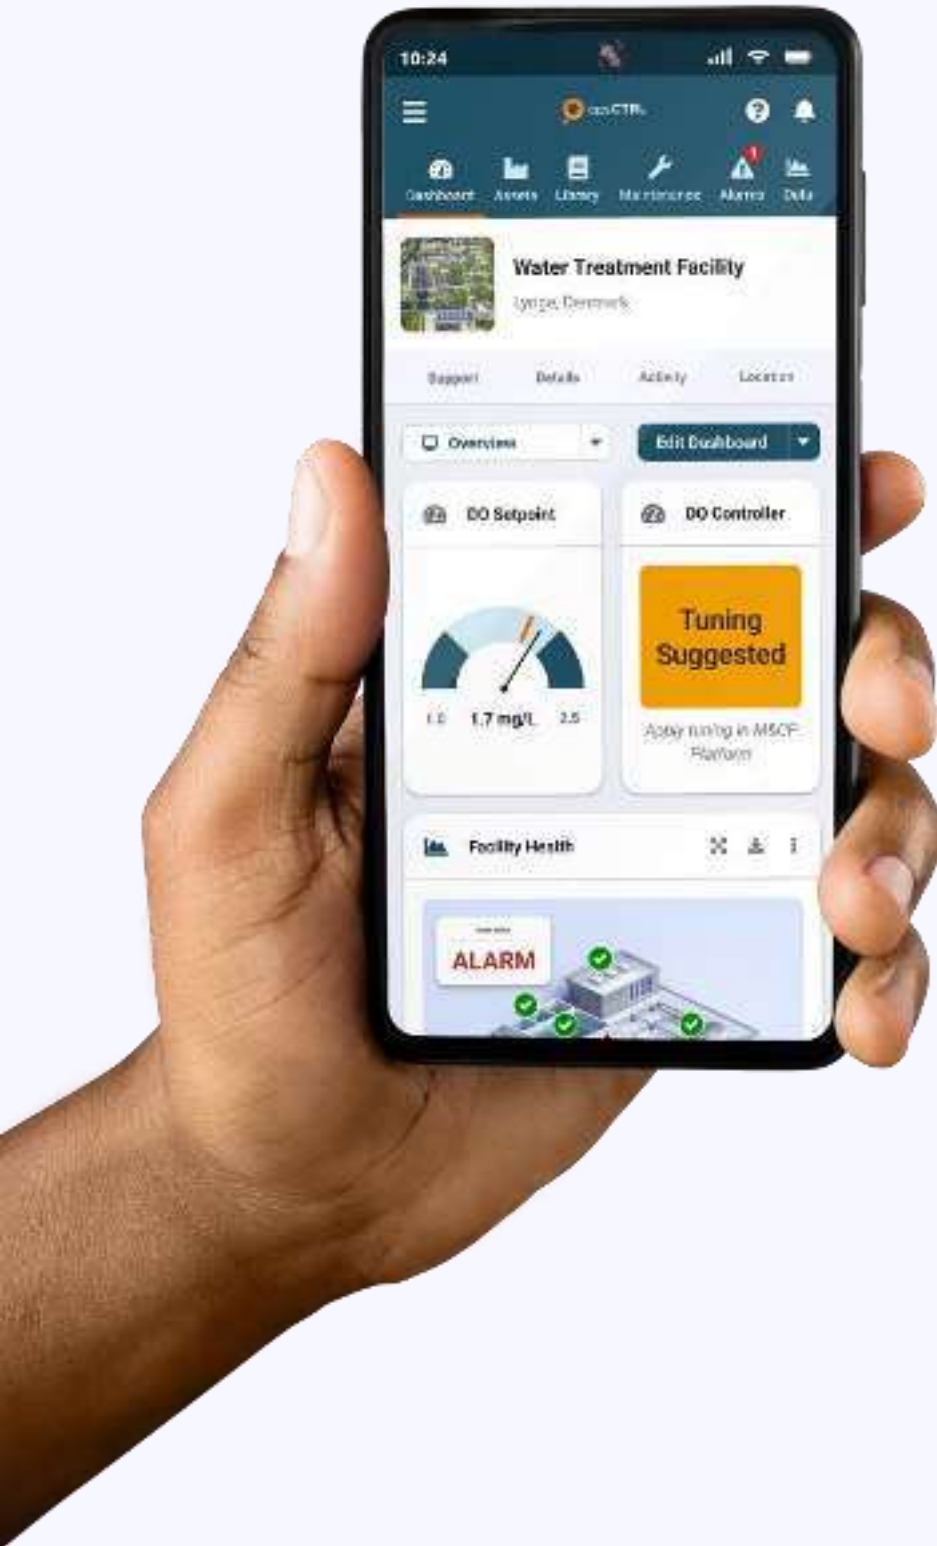

## THE INTELLIGENT OPERATIONS PLATFORM FOR WATER, WASTEWATER, & BIOGAS FACILITIES

**opsCTRL is an Intelligent Operations Platform that centralizes plant data, transforms it into actionable insights, and empowers teams to make smarter decisions.**

- Built for water, wastewater, and biogas facilities, it works alongside your SCADA, HMI, or as a stand-alone solution to connect operators, managers, and engineers to their plant or asset.
- By unifying data and applying advanced analytics, opsCTRL enables better collaboration and more efficient operations.

# Our Philosophy

## HOW WE SUPPORT INTELLIGENT OPERATIONS

### TOOLSET

- OpsCTRL is **modular and user-friendly**, so you can choose the tools you need.
- It works with your current set up and **scales as you grow**.

### MINDSET

- We don't believe in **black-box AI solutions**.
- We focus on **practical tools** that help Operators & Engineers make data-driven decisions.

# Our Approach

## HOW WE DELIVER INTELLIGENT OPERATIONS

### 1 LOW UPFRONT INVESTMENT

Flexible subscription-based pricing minimizes capital investments.

### 2 ACCESSIBLE ANYTIME, ANYWHERE

A cloud-based platform that works on Android, iOS, and any major browser.

### 3 BOOST EFFICIENCY AND RESILIENCE

Save time, reduce costs, and mitigate risks with advanced analytics and streamlined operations.

### 4 FULLY CUSTOMIZABLE

Highly flexible and user-friendly to meet your specific needs.

### 5 SCALABLE FOR THE FUTURE

Easy to implement today, intuitive to expand as your facility evolves.

### Lightweight Setup, Endless Potential

opsCTRL is designed to be accessible, efficient, and scalable, enabling you to achieve operational excellence with minimal barriers.

# Benefits to Facilities

# Benefits to Facilities

## UNLOCK YOUR FACILITY'S FULL POTENTIAL

### REMOTE MONITORING

Stay connected and address issues proactively with real-time visibility and alerts.

### DATA-DRIVEN MAINTENANCE

Prevent costly breakdowns and optimize equipment life with predictive insights.

### OPERATIONS & KNOWLEDGE CAPTURE

Ensure consistency and safeguard critical knowledge with accessible digital workflows.

### DECISION SUPPORT

Transform data into actionable insights for smarter, more efficient decision-making.

# Benefits to Facilities

## REMOTE MONITORING

### Stay Connected: Unlock the Power of Remote Monitoring

Gain real-time visibility into your operations with alarms and dashboards powered by remote monitoring.

#### 1 PROACTIVELY ADDRESS ISSUES

Minimize downtime and unnecessary overtime with real-time alerts.

#### 2 "PLANT-IN-YOUR-POCKET" CONVENIENCE

Access your facility's data from anywhere, ideal for decentralized systems or limited historical data capture.

#### 3 ENHANCE SECURITY

Reduce risks with secure, modern monitoring compared to traditional remote control methods.

# Benefits to Facilities

## DATA-DRIVEN MAINTENANCE

### Optimize Maintenance, Prevent Failures

Extend the life of your equipment and ensure warranty compliance with preventative and condition-based maintenance powered by data.

#### 1 PREVENT COSTLY DOWNTIME

Avoid unplanned outages and ensure compliance with warranty requirements.

#### 2 OPTIMIZE SCHEDULES

Use data-driven insights to streamline maintenance, making your team more efficient than with traditional routines.

# Benefits to Facilities

## OPERATIONS & KNOWLEDGE CAPTURE

### Protect Knowledge, Enhance Workflows

Ensure consistency in your operations with robust documentation that safeguards critical knowledge and streamlines workflows.

#### 1 PREVENT KNOWLEDGE LOSS

Protect your organization when key team members are unavailable.

#### 2 STREAMLINE SOPs

Digitize workflows to make Standard Operating Procedures (SOPs) accessible and actionable.

#### 3 BOOST TEAM EFFICIENCY

Ensure consistency across shifts with standardized, easily accessible workflows.

# Benefits to Facilities

## DECISION SUPPORT

### Turn Data into Smarter Decisions

Make better decisions with advanced insights and proactive tools that transform raw data into actionable information for improved process management.

#### 1 DRIVE SMARTER DECISION-MAKING

Transform raw data into actionable insights with integrated, customizable KPIs.

#### 2 BE PROACTIVE

Optimize processes, mitigate risks, and ensure compliance with tools tailored to your facility's needs.

#### 3 STAY AHEAD OF ISSUES

Prevent problems before they escalate with early-warning signals and resource planning customized to your operations.

#### 4 ACHIEVE EFFICIENCY GAINS

Improve energy savings, production, and resource optimization with metrics aligned to your goals.

# Benefits to Suppliers

# Benefits to Suppliers

## EMPOWER YOUR BUSINESS WITH opsCTRL

### REMOTE MONITORING

Deliver smarter services with real-time insights to boost customer satisfaction and business growth.

### SUPPLIER SERVICE OFFERING

Craft versatile, cost-effective service packages that strengthen customer loyalty and meet modern demands.

### SUPPLIER PRODUCT ANALYSIS

Leverage real-world data to enhance products, solve systemic issues, and outperform competitors.

### WARRANTY MANAGEMENT

Streamline processes and cut costs with data-driven warranty support and predictive insights.

### CUSTOMER LIFECYCLE OPPORTUNITIES

Unlock upsell opportunities, drive repeat business, and deliver ongoing value across the customer journey.

# Benefits to Suppliers

## REMOTE MONITORING

### Stay Ahead with Smarter Monitoring

opsCTRL's remote monitoring capabilities enable suppliers to deliver smarter, more efficient services that drive customer satisfaction and growth.

#### 1 PROACTIVELY ADDRESS CUSTOMER NEEDS

Use real-time monitoring to create opportunities for timely maintenance, upgrades, and replacements.

#### 2 ADD SERVICE VALUE

Provide actionable insights to help customers optimize their operations, positioning your company as a trusted partner.

#### 3 REDUCE COSTS

Streamline operations by minimizing the need for onsite visits with remote issue resolution and analysis.

#### 4 INCREASE REVENUE

Strengthen recurring income streams with subscription-based remote monitoring services tailored to customer needs.

# Benefits to Suppliers

## SUPPLIER SERVICE OFFERING

### Design Flexible Services That Deliver Value

opsCTRL enables suppliers to craft versatile service packages that deliver value, foster loyalty, and drive growth.

#### 1 OFFER FLEXIBLE MODELS

Provide a range of services, from fully digital (remote monitoring) to hybrid (onsite visits + consulting).

#### 2 SAVE COSTS

Avoid the expense of building and maintaining proprietary remote monitoring systems.

#### 3 STRENGTHEN RELATIONSHIPS

Stay connected to customer operations, creating opportunities for long-term loyalty and repeat business.

#### 4 MEET CUSTOMER DEMANDS

Address modern expectations for innovative, digital-first service solutions.

# Benefits to Suppliers

## SUPPLIER PRODUCT ANALYSIS

### Leverage Data to Enhance Products

opsCTRL provides suppliers with real-world performance data, enabling data-driven improvements and better engineering decisions.

#### 1 ELIMINATE GUESSWORK

Use data to continuously improve and streamline value engineering processes.

#### 2 SOLVE SYSTEMIC ISSUES

Leverage clear, evidence-based insights to enhance product reliability and performance.

#### 3 STAY COMPETITIVE

Address product issues faster than competitors and gain a competitive edge.

# Benefits to Suppliers

## WARRANTY MANAGEMENT

### Simplify Warranty Management with Data

opsCTRL strengthens warranty management for suppliers, reducing costs and improving customer satisfaction.

#### 1 REDUCE RISKS

Identify warranty risks early with data-backed performance insights, minimizing claims and downtime.

#### 2 STREAMLINE PROCESSES

Centralize data on product usage and maintenance history for efficient verification.

#### 3 CUT COSTS

Prevent major failures with predictive analytics to address warranty issues early.

#### 4 BUILD TRUST

Deliver transparent and efficient warranty support backed by reliable data.

# Benefits to Suppliers

## CUSTOMER LIFECYCLE OPPORTUNITIES

### Maximize Growth with Lifecycle Insights

opsCTRL helps suppliers unlock opportunities across the customer lifecycle, driving growth and deepening relationships.

#### 1 UPSELL AND CROSS-SELL EFFECTIVELY

Use customer data to identify new revenue opportunities.

#### 2 DRIVE REPEAT BUSINESS

Deliver value-added services that keep your brand top of mind.

#### 3 ENHANCE CUSTOMER SATISFACTION

Leverage lifecycle insights to anticipate needs and deliver tailored solutions.

# opsCTRL Key Features

# opsCTRL Key Features

## KEY FEATURES AT A GLANCE

### ALARMS

Stay ahead of critical issues with real-time alerts tailored to your operations, minimizing disruptions and improving response times.

### DASHBOARDS

Gain actionable insights with customizable dashboards designed for real-time monitoring and decision-making.

### MAINTENANCE & WORKFLOWS

Optimize your operations and maintenance to keep your equipment and processes running smoothly.

### DECISION SUPPORT

Transform raw data into actionable insights with powerful analytics for smarter, faster decision-making.

### REPORTS

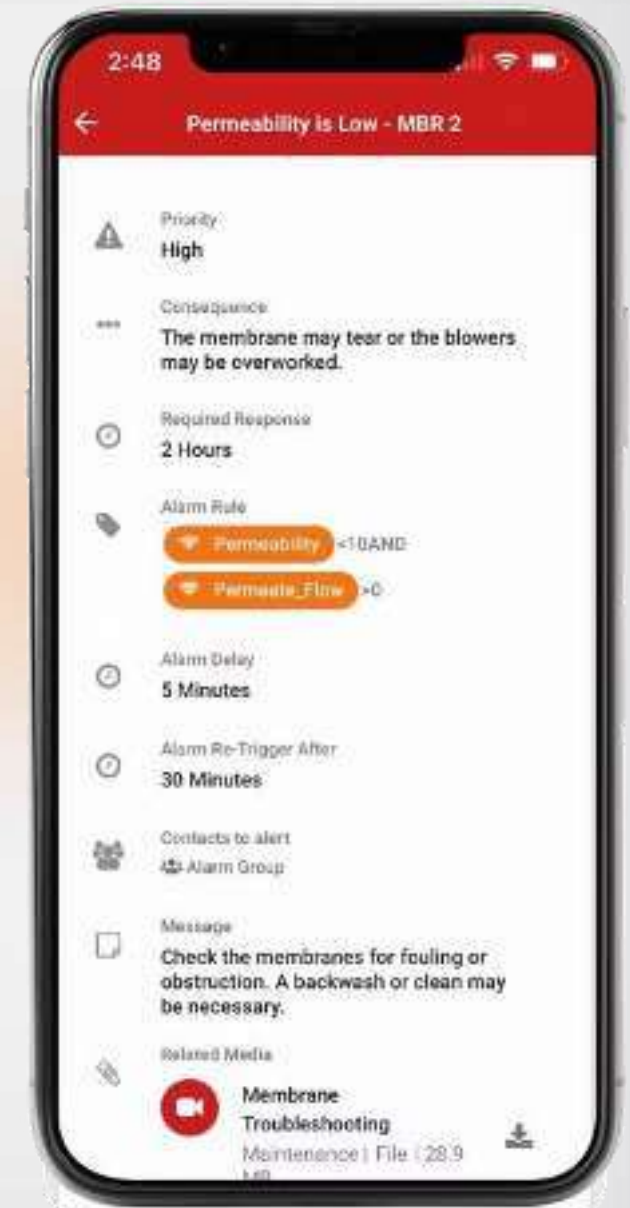

Simplify and automate report generation to save time, meet compliance needs, and keep stakeholders informed.

# Feature: Alarms

**opsCTRL Alarms notify operators of critical issues, such as equipment malfunctions or process deviations, enabling faster response and minimizing disruptions.**

- Customizable rules ensure the right balance of alarms—avoiding nuisance alerts while ensuring no critical issues are missed.
- Provides tools to manage, prioritize, and resolve alarms effectively, tailored to real-time data from sensors, calculations, or manual inputs.

# Feature: Alarms

## WHAT IT MEANS FOR YOU

### 1 PROACTIVE MONITORING

Real-time alerts help avoid disruptions and downtime, ensuring smooth operations.

### 2 CUSTOMIZABLE AND CONTEXTUAL

Adapt alarms to fit your facility's needs and enable remote troubleshooting to reduce site visits.

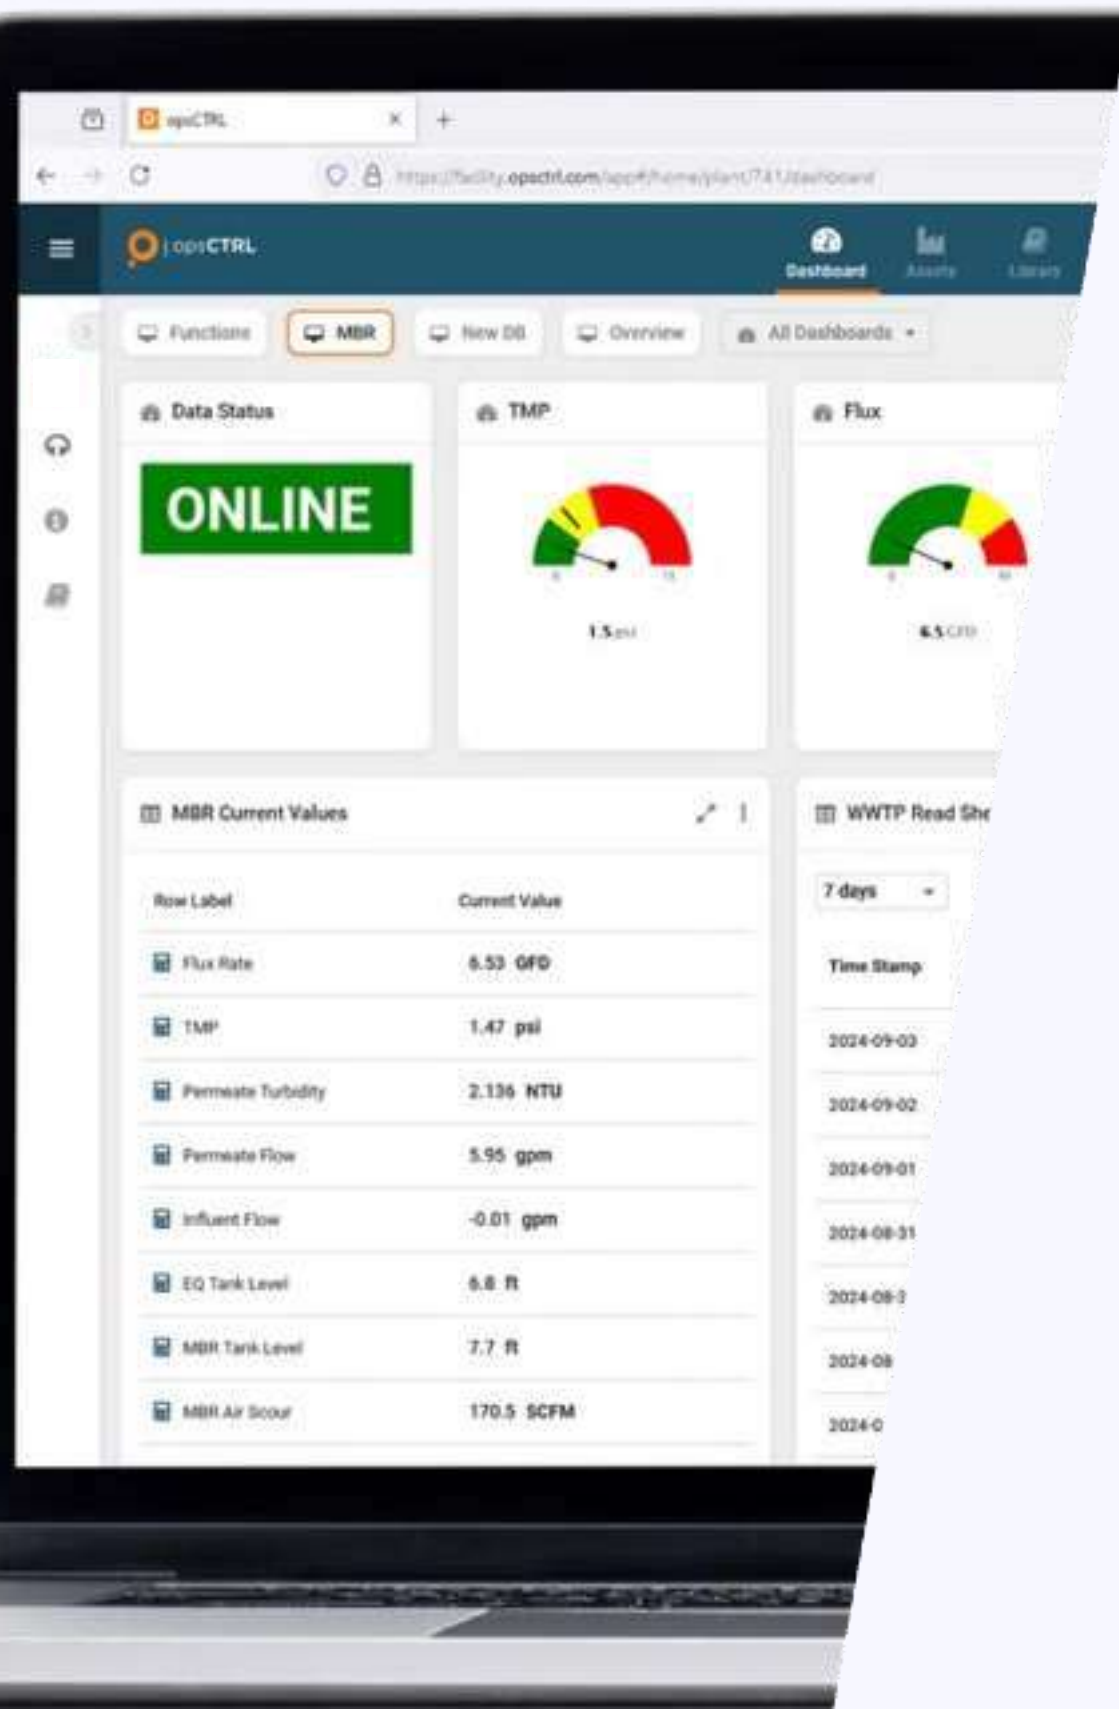

### 3 IMPROVED TEAM COORDINATION

Assign alarms to team members, track resolution progress, and enhance accountability.

### 4 DATA-DRIVEN INSIGHTS

Review alarm trends for root-cause analysis and operational improvements.

# Feature: Dashboards

**Dashboards provide a centralized interface for visualizing and analyzing real-time and historical data.**

- Fully customizable with charts, tables, widgets, and KPIs to suit operational needs.
- Allows users to create, share, and personalize dashboards for specific roles and responsibilities.

# Feature: Dashboards

## WHAT IT MEANS FOR YOU

### 1 CONTINUOUSLY UP-TO-DATE DATA

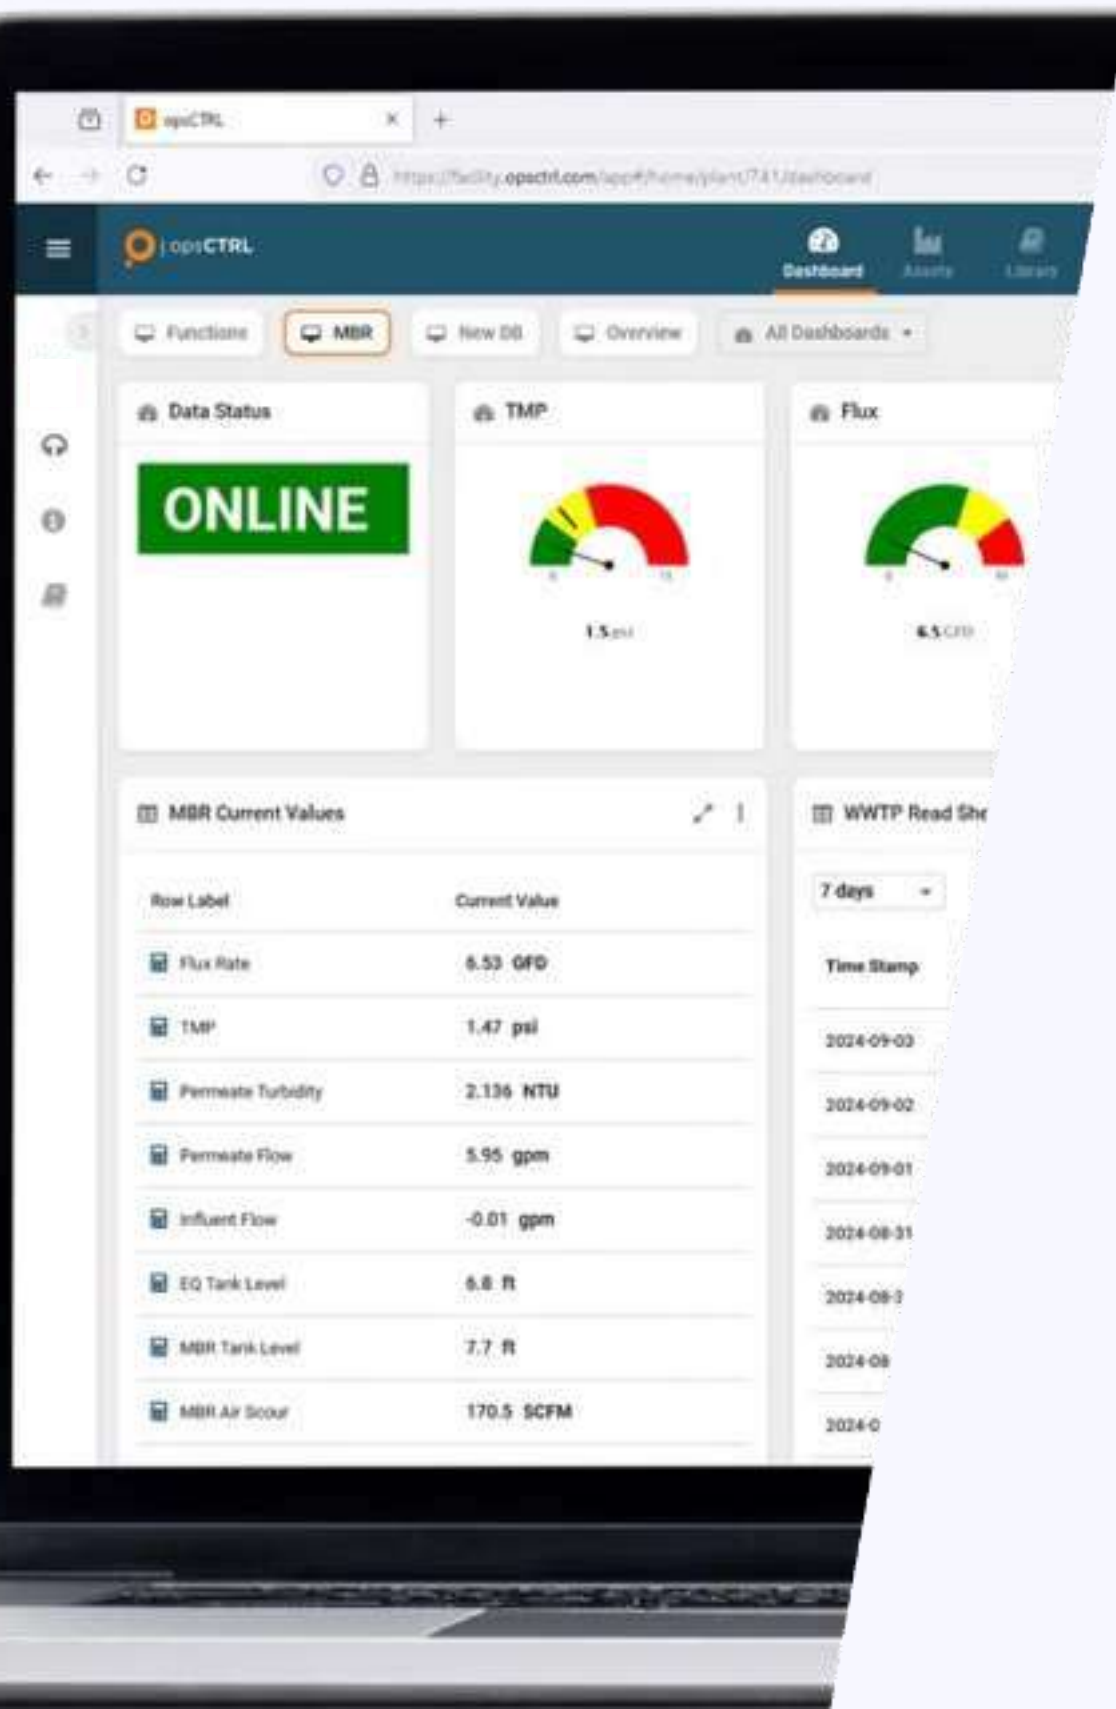

Access real-time insights with no delays, enabling confident decision-making.

### 2 TELL A COMPLETE STORY

Visualize trends and group data to uncover actionable insights.

### 3 EMPOWER YOUR TEAM

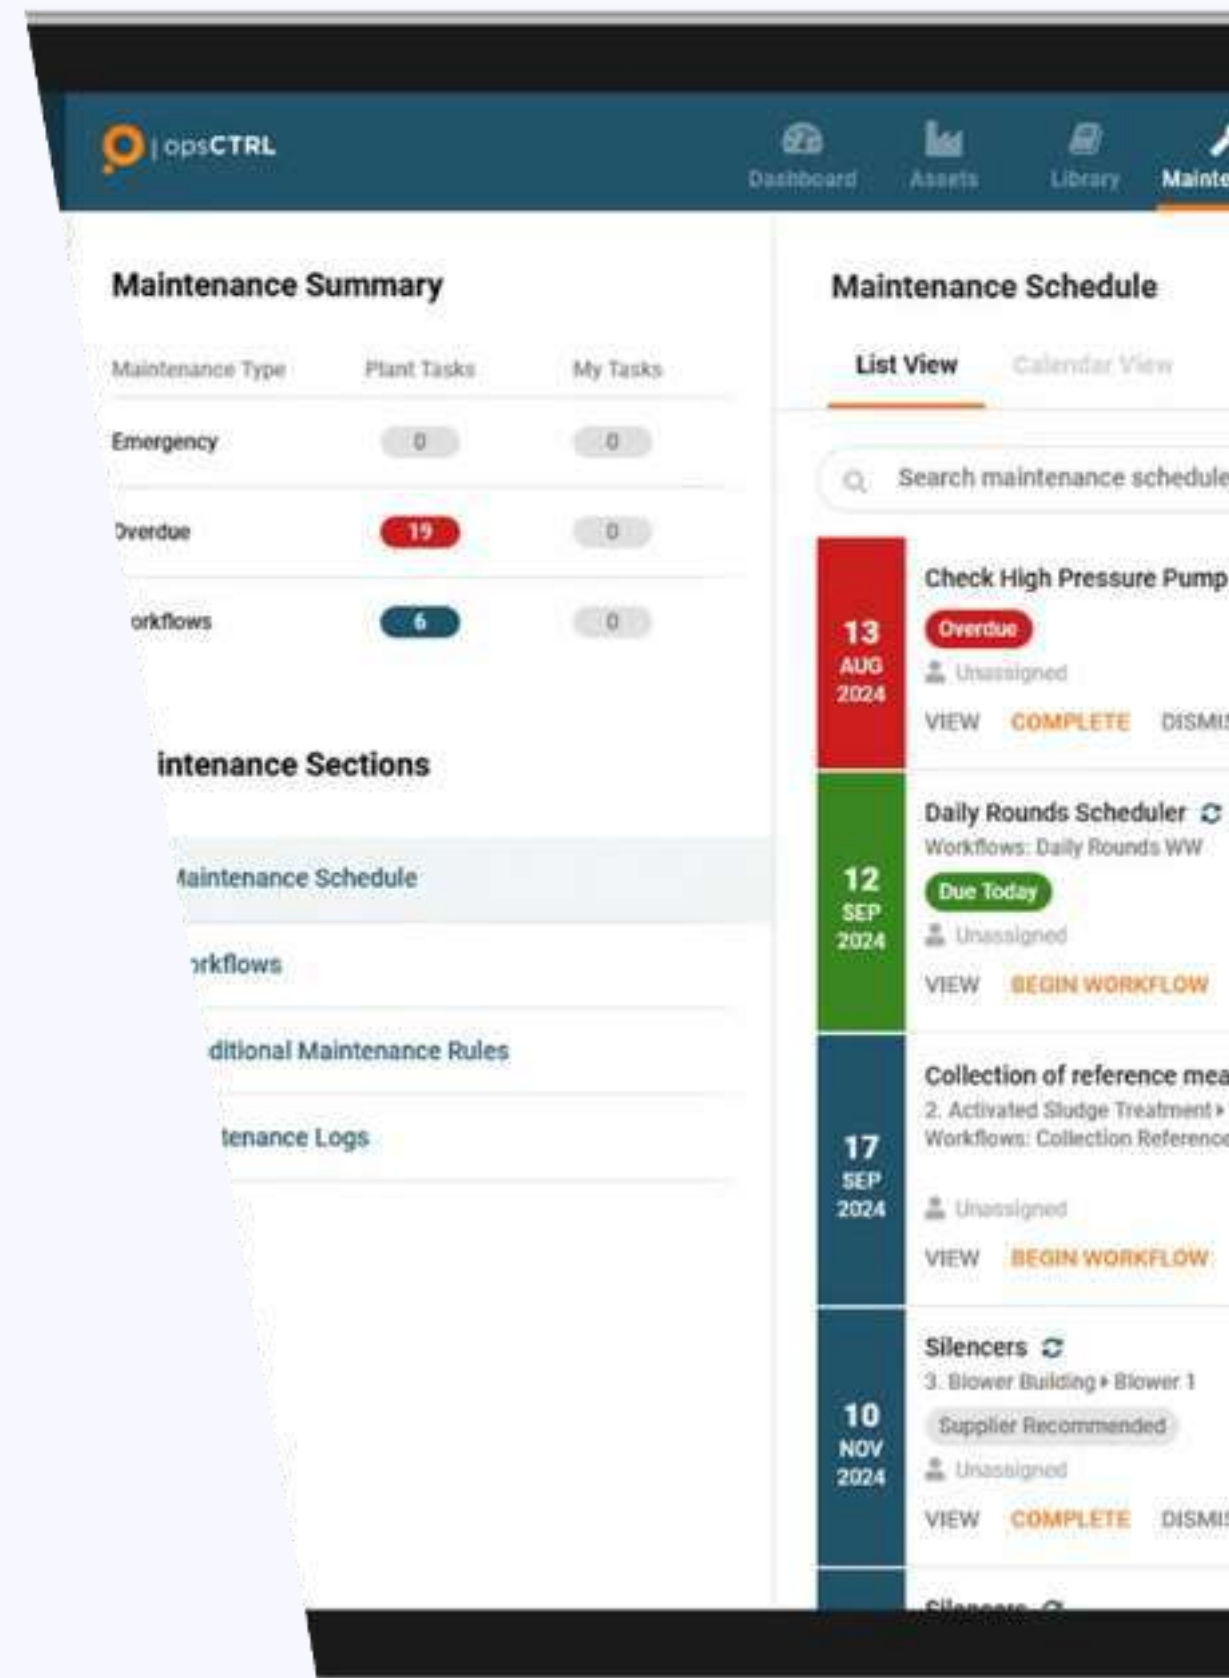

Equip teams with intuitive dashboards that provide the data they need for their specific roles.

# Feature: Maintenance & Workflows

**Simplifies the management of routine, preventative, and conditional maintenance tasks to ensure asset reliability.**

- Supports task scheduling, real-time maintenance triggers, and digital workflows for standard operating procedures.
- Logs and tracks maintenance activities comprehensively.

# Feature: Maintenance & Workflows

## WHAT IT MEANS FOR YOU

- 1

STAY ON TOP OF MAINTENANCE

Automate task scheduling to reduce manual workload and guesswork.
- 2

MAXIMIZE UPTIME

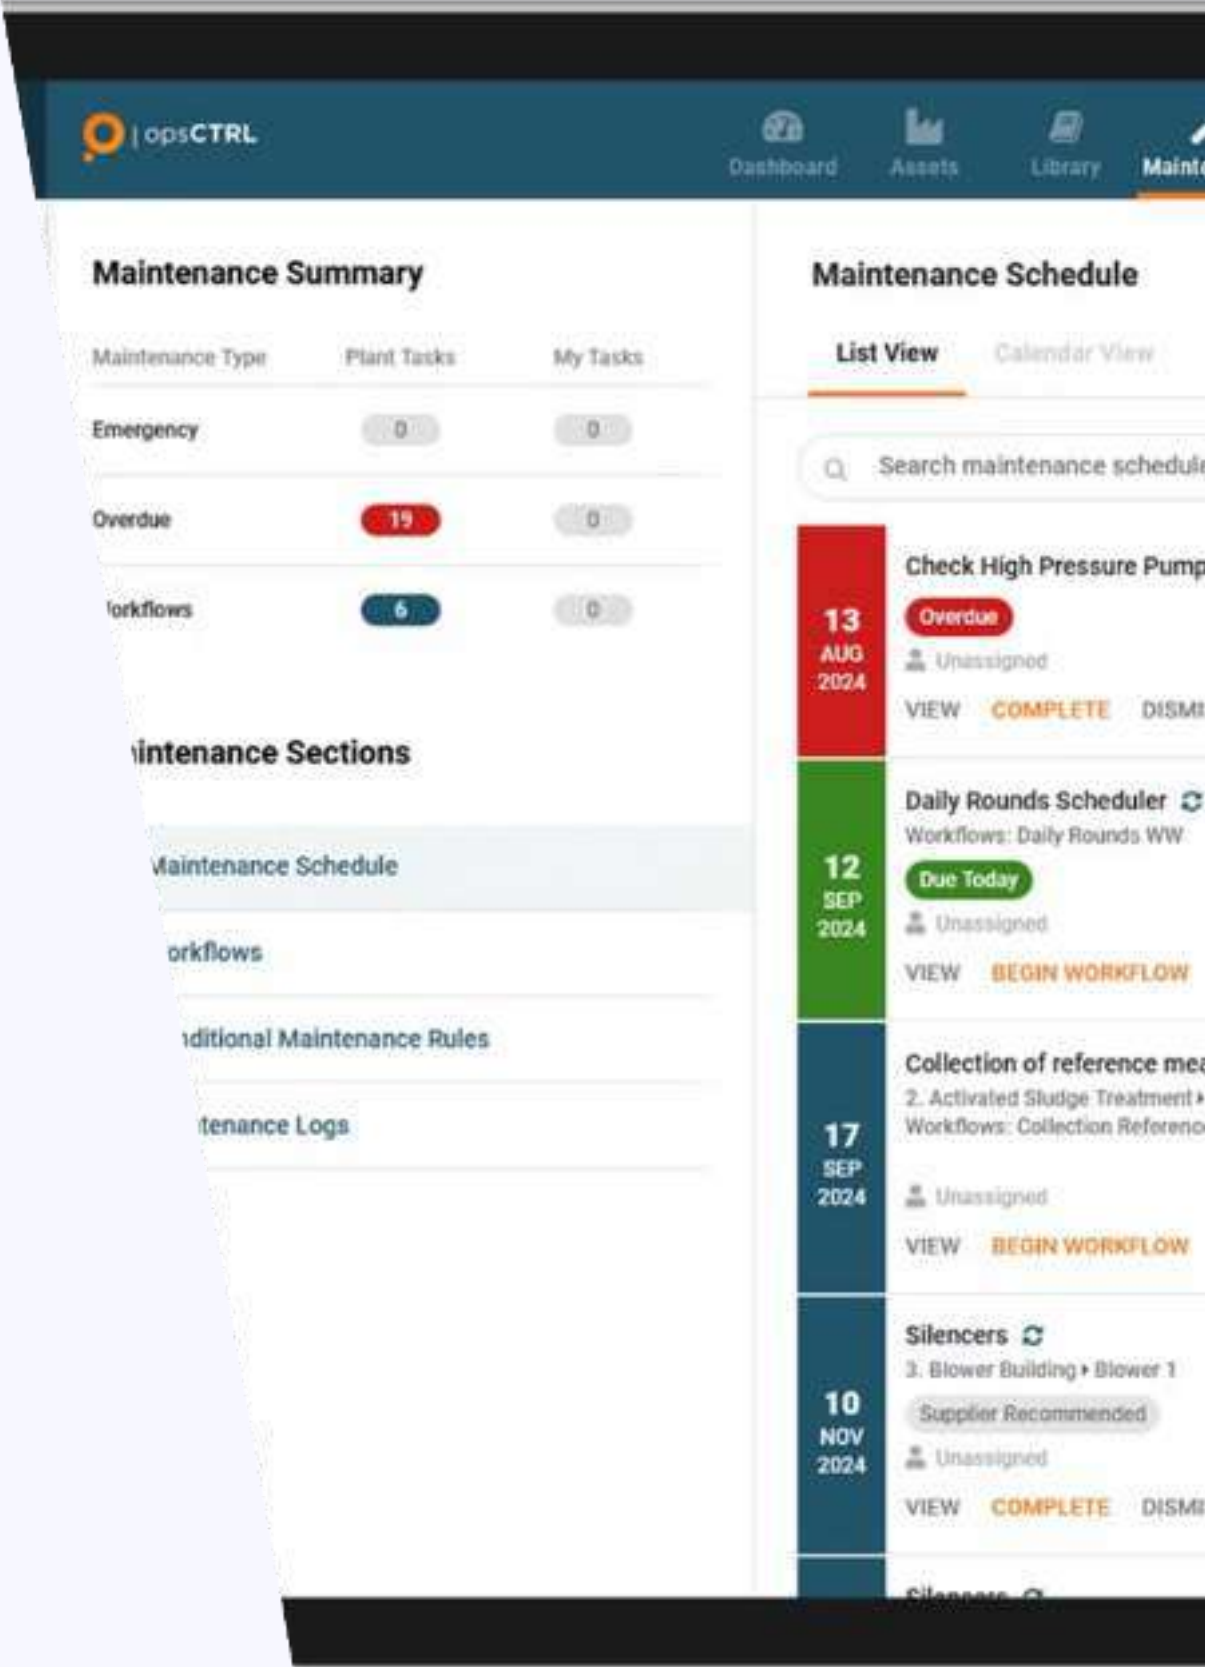

Minimize downtime with proactive maintenance planning and execution.
- 3

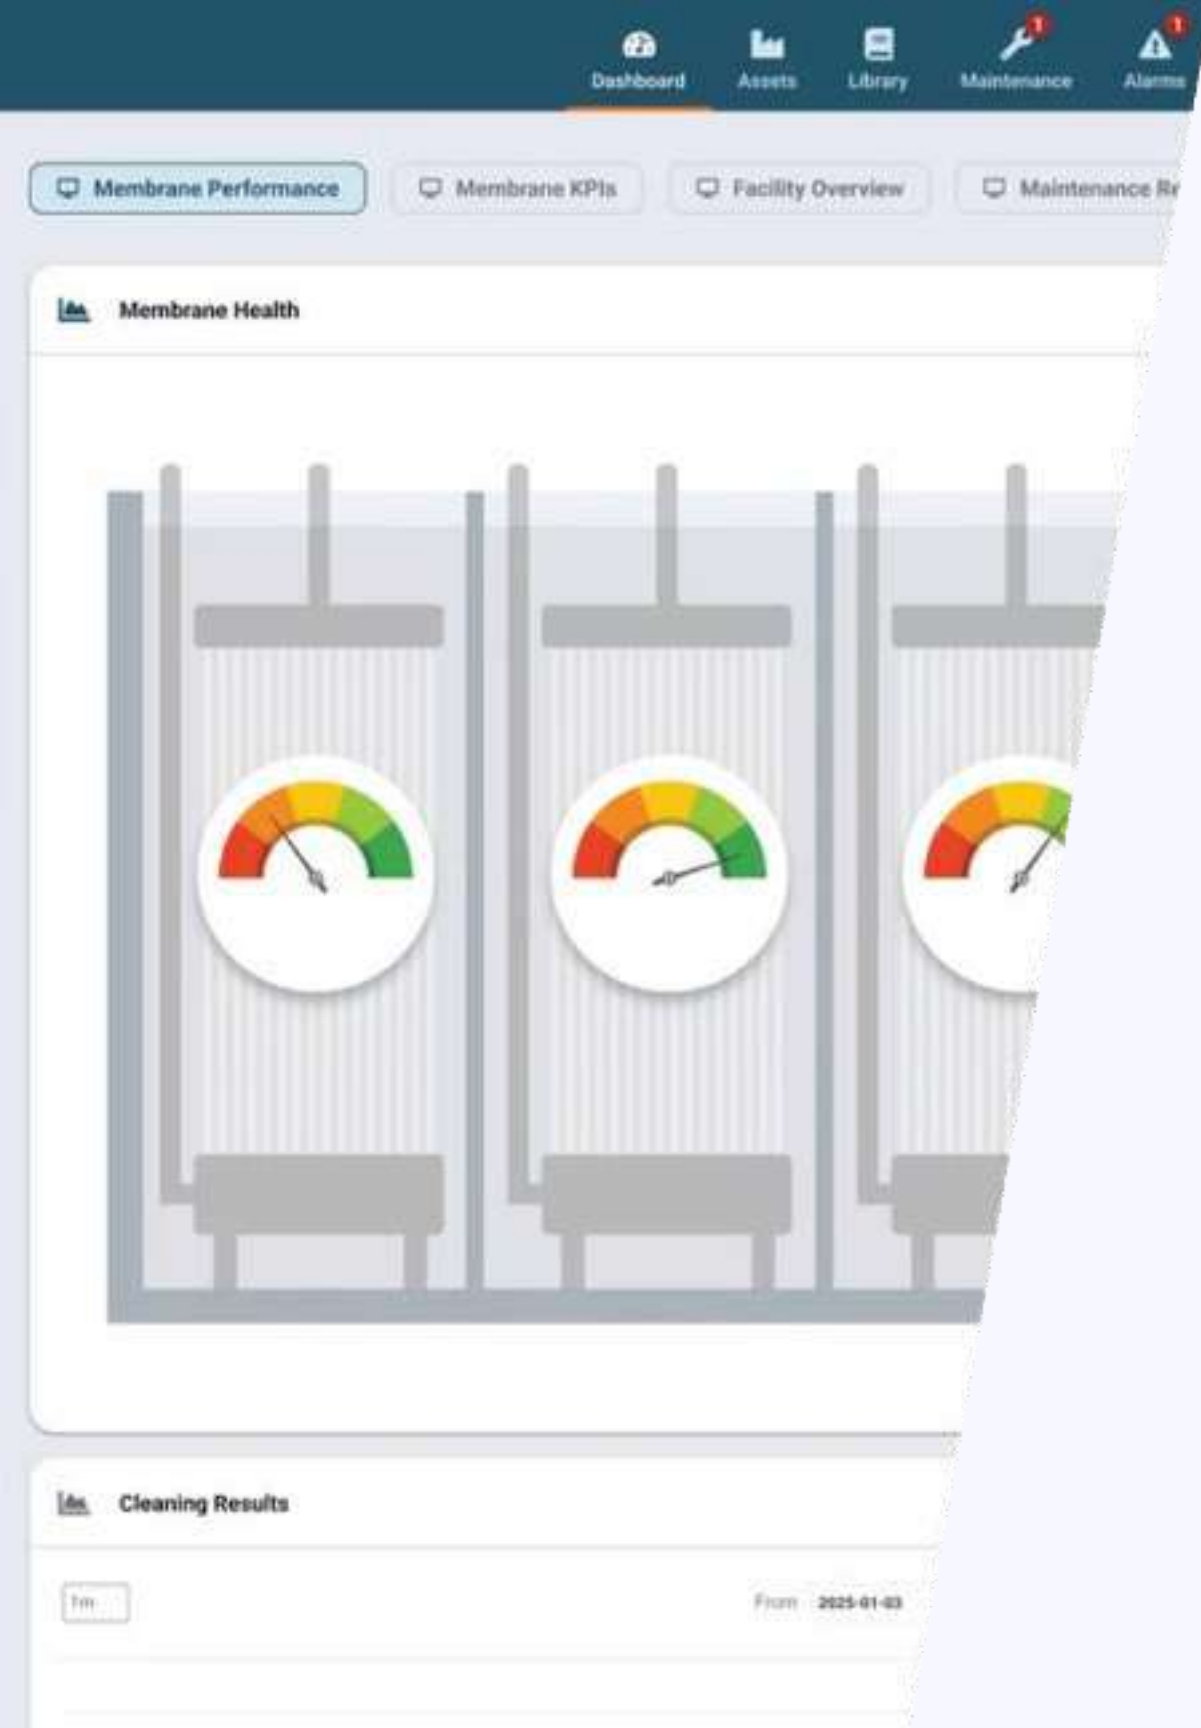

QUICK REFERENCE AT YOUR FINGERTIPS

Centralize maintenance data for quick access and informed decision-making.
- 4

CAPTURE ACTIONABLE INSIGHTS

Convert manual logs into meaningful data to improve future planning.

# Feature: Decision Support

**Transforms raw data into actionable insights using advanced analytical functions.**

- Includes features like membrane cleaning analysis, SRT and chemical load calculations, and flow forecasting.
- Enables more informed operational decisions through intuitive data processing.

# Feature: Decision Support

## WHAT IT MEANS FOR YOU

**1**

### STREAMLINED DATA PROCESSING

Save time by automating raw data analysis for faster decisions.

**2**

### INTUITIVE DATA ACCESS

Access critical variables easily without relying on spreadsheets.

**3**

### PROACTIVE PLANNING

Make confident decisions using precise, real-time insights.

# Feature: Reporting

**Simplifies report compilation, scheduling, and automation for operational and regulatory needs.**

- Customizable to meet the specific requirements of stakeholders, including compliance reporting.

The screenshot displays the 'Schedule Report' configuration screen. It features an orange header with a back arrow and the title 'Schedule Report'. Below the header, there are several settings:

- Enable Recurring Delivery:** A toggle switch that is currently turned off, accompanied by a clock icon and a help icon.
- Recurring Frequency:** A dropdown menu with a calendar icon, currently set to 'Daily'.
- Time of Day:** A dropdown menu currently set to '11:00', accompanied by a help icon.
- Report Resolution:** A dropdown menu currently set to 'Daily'.
- Aggregate:** A dropdown menu currently set to 'Average', accompanied by a help icon.
- Report Range:** A dropdown menu with a star icon, currently set to 'Last 24 Hours', accompanied by a help icon.

At the bottom of the screen, there is a partially visible section labeled 'ipients' and an orange button labeled 'inCTRL Support' with a close icon.

# Feature: Reporting

## WHAT IT MEANS FOR YOU

### 1 SAVE TIME

Automate reporting processes to focus on higher-value tasks.

### 2 CUSTOMIZABLE FOR STAKEHOLDERS

Generate tailored reports for internal teams or external partners with ease.

### 3 EFFORTLESS COMPLIANCE

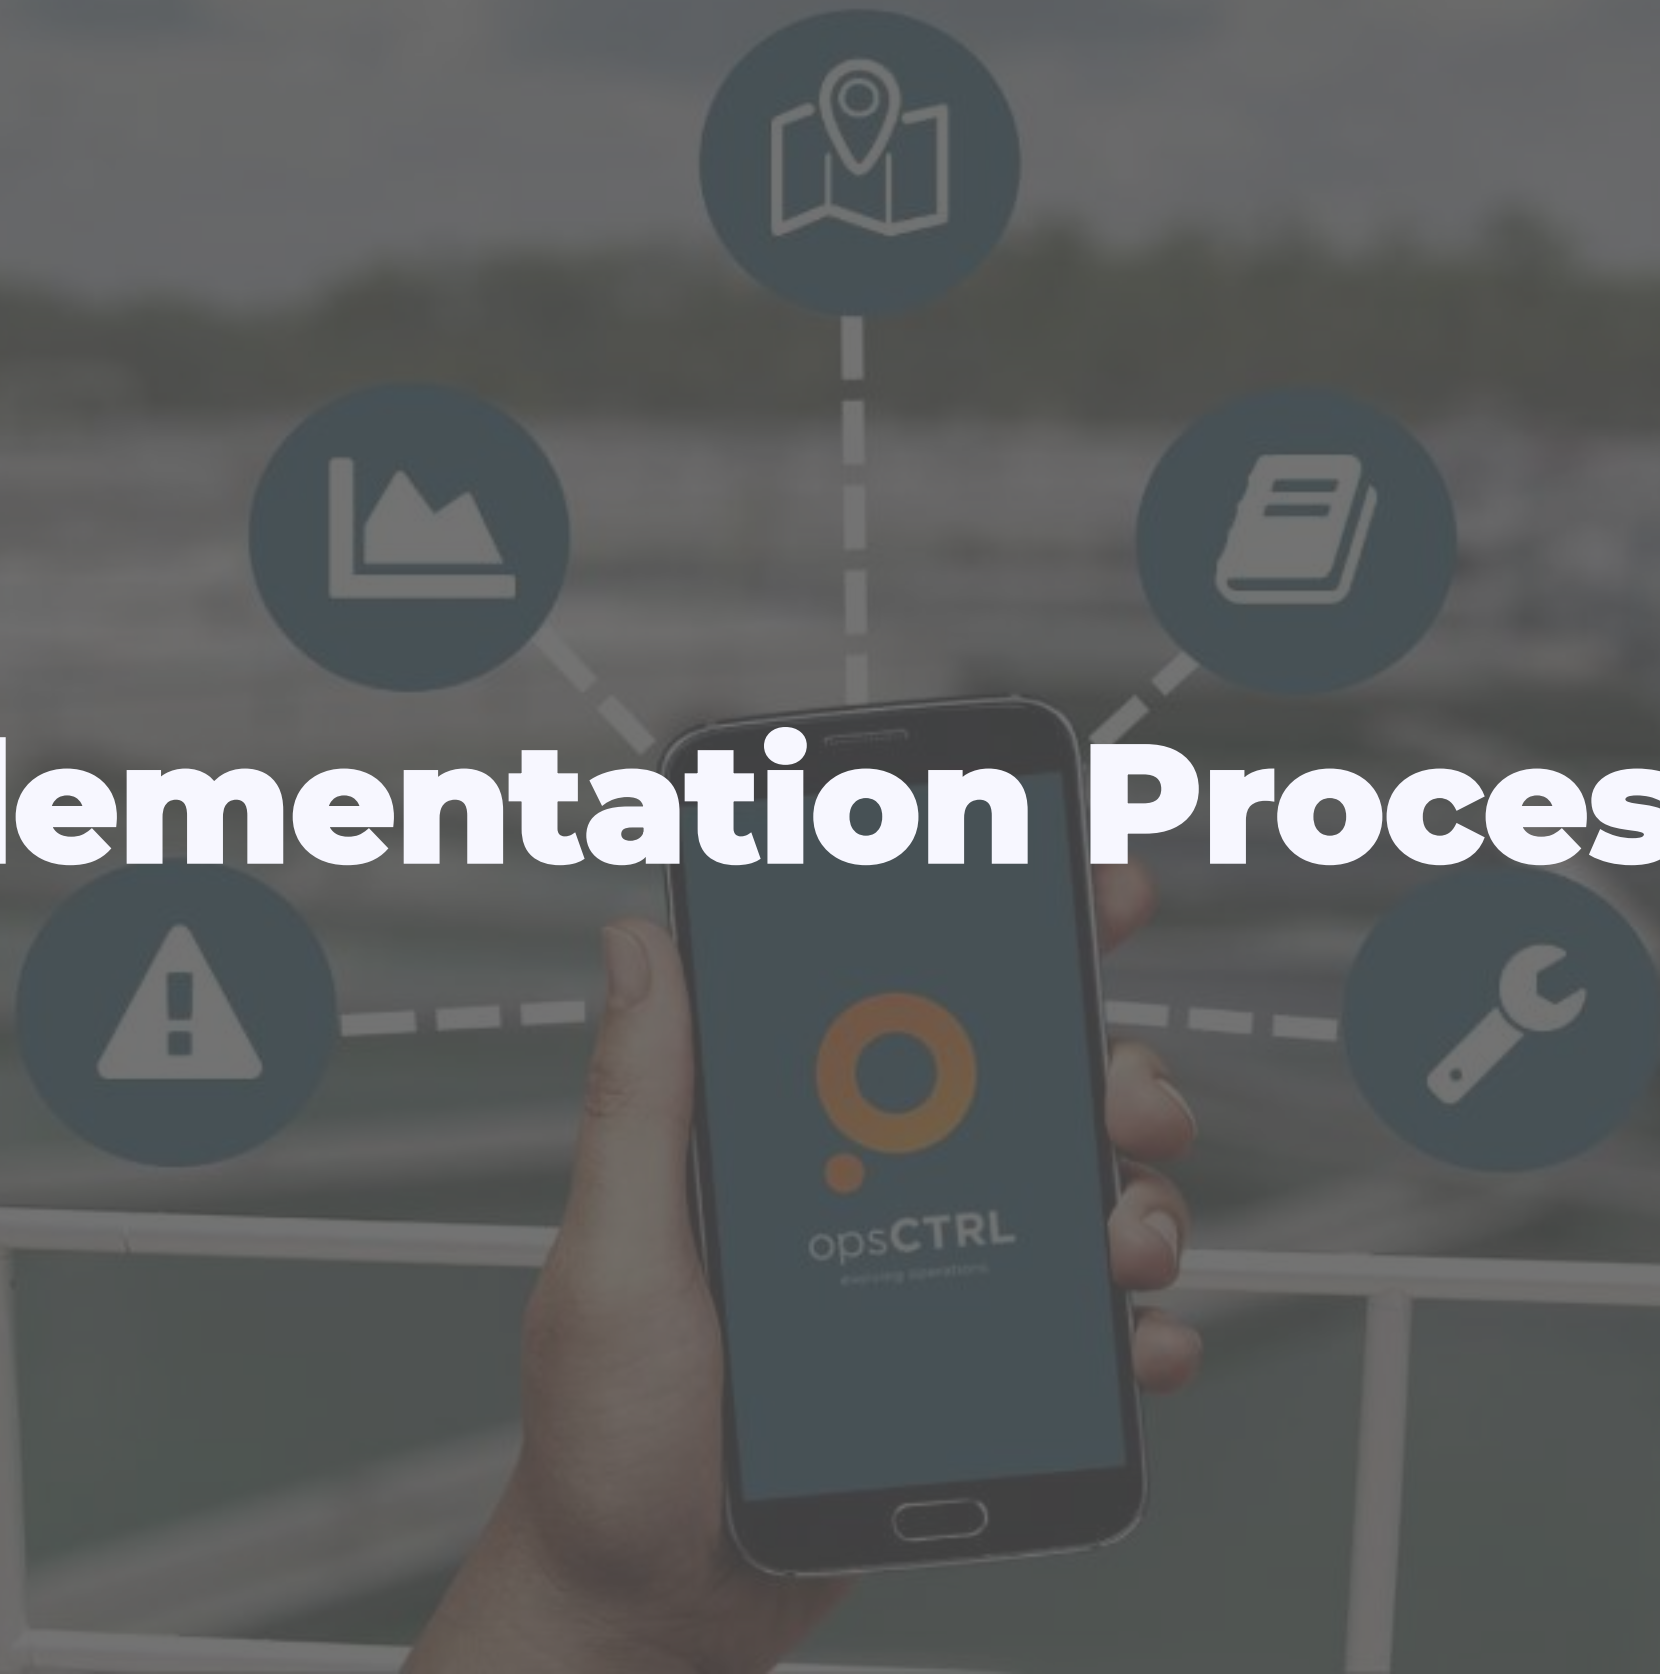

Ensure adherence to industry standards with streamlined regulatory reporting.

The screenshot shows a mobile application interface for a 'Report Template'. At the top, there is an orange header with a back arrow and the title 'Report Template'. Below the header, the 'Report Name' is set to 'Daily Data', with a tag icon on the left and a close icon on the right. Three action buttons are visible: 'EXPORT REPORT' (highlighted in orange), 'SCHEDULE', and 'EDIT'. Below these buttons, there are two tabs: 'REPORT FIELDS' (active, highlighted with an orange underline) and 'EXPORT LOGS'. Under the 'REPORT FIELDS' tab, a list of report fields is shown, each with a small icon on the left and a unit on the right: 'AIT\_TURB1\_ALL' with unit 'NTU', 'Aeration\_Zone\_Pass\_1\_DO' with unit 'mg / L', and 'Digester\_Level' with unit 'ft'.

Report Name	Actions
Daily Data	EXPORT REPORT   SCHEDULE   EDIT

REPORT FIELDS	EXPORT LOGS
AIT_TURB1_ALL NTU	
Aeration_Zone_Pass_1_DO mg / L	
Digester_Level ft	

# Implementation Process

# opsCTRL Implementation Process

**Seamlessly implement opsCTRL into your operations with real-time monitoring, data-driven decision-making, and long-term value. Benefit from expert guidance and support at every step.**

**1**

## **BASIC SET UP (1-2 Weeks)**

- Create account and add users.
- Establish secure data connection.

**2**

## **DEFINE GOALS & TIMELINE (2-4 Weeks)**

- Conduct kickoff meeting with the Operations Team.
- Analyze flowing data, existing processes and gather materials.
- Set success goals and implementation timeline.

**3**

## **BUILD & REFINE CONTENT (3-6 Months)**

- Develop custom opsCTRL content with expert support.
- Review and test content with the Operations Team.
- Refine content through bi-weekly or monthly reviews.

# Data Connection

## Get the most out of your data

Leverage your equipment and sensor data to power intelligent, data-driven operations.

### QUICK FACTS

Secure, one-way connection established from your data source (PLC, SCADA, etc.) to opsCTRL.

End-to-end encryption ensures data remains protected during transmission.

Cloud-based storage allows access to your data anytime, anywhere, from any device.

Full control over data access with account admin permissions.

# Secure Data Connection Methods

## GETTING DATA FROM YOUR PLANT INTO opsCTRL: EWON CONNECTION

### BEST FOR YOU IF YOU:

- Want a simple and fast way to connect your data.
- Manage a moderate number of data tags (up to 1,000 tags/min and 3 PLCs).
- Can integrate a small IoT device into your panel.

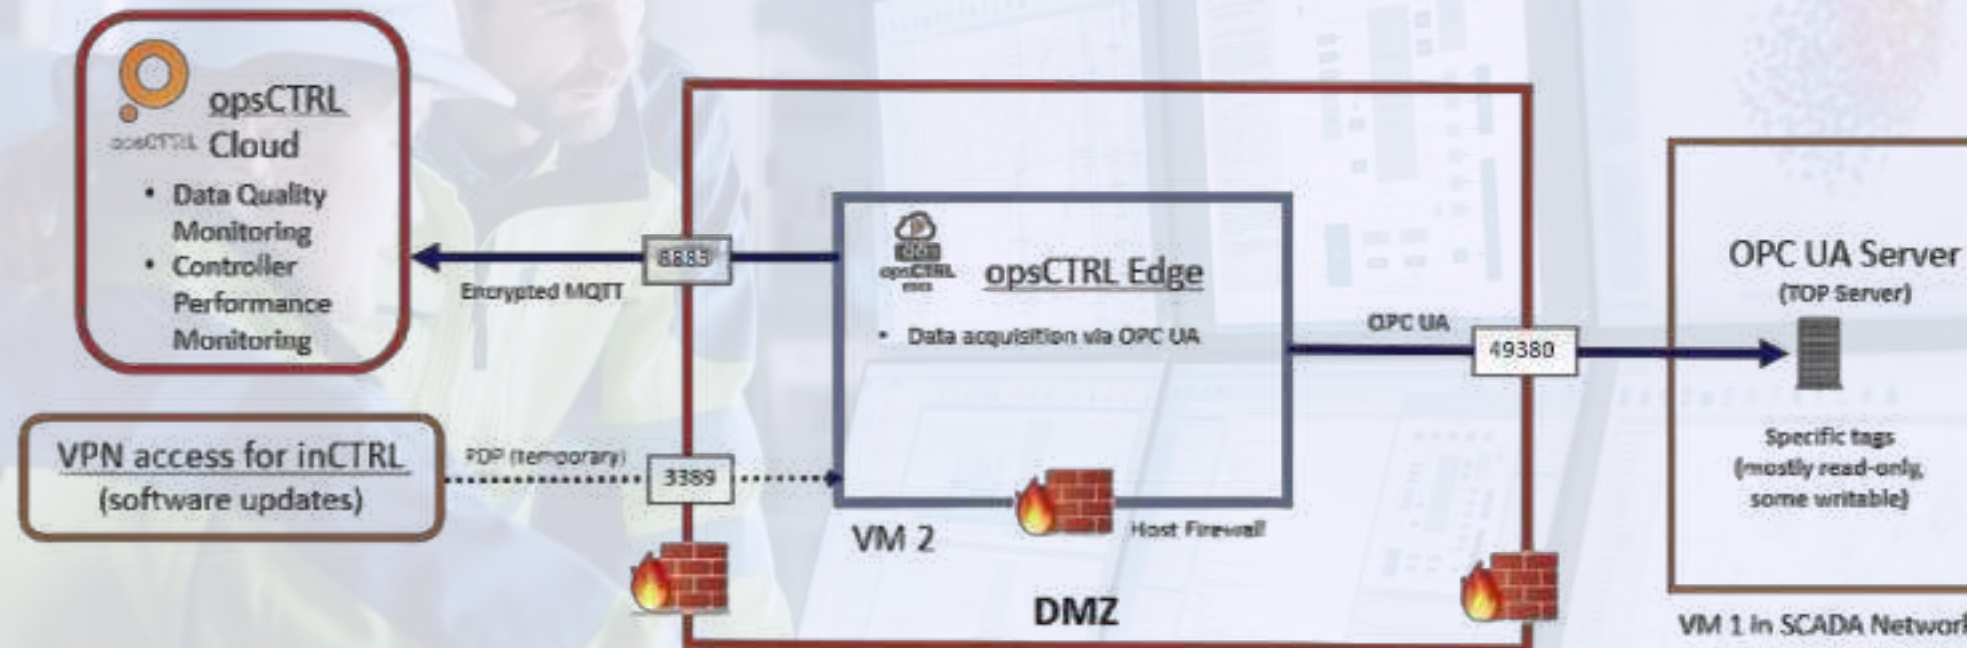

### REQUIREMENTS:

- A PLC connection via Ethernet.
- Space for an Ewon device with a power supply.
- An external antenna for the Ewon (via coaxial cable).
- Internet connection via local network or managed cellular service.

# Secure Data Connection Methods

## GETTING DATA FROM YOUR PLANT INTO opsCTRL: opsCTRL EDGE

### BEST FOR YOU IF YOU:

- Need maximum control over connections.
- Have a high volume of data tags (>1,000 tags, unlimited devices).
- Have IT resources to configure a virtual machine and connect to your PLC.

### REQUIREMENTS:

- A PLC connection (Modbus TCP or OPC UA server) with access to data tags.
- A virtual machine in a secure network (DMZ) with pre-configured ports.
- IT support for installing and configuring the Edge software.

# Implementation Services

## OUR OFFERINGS

### COMPLIANCE REPORTING

Manage your data and automate compliance reporting with ease.

### ON-SITE ONBOARDING

In-plant visits to onboard and train your operations team.

### INTEGRATION SERVICES

Seamlessly integrate opsCTRL with other systems and data sources.

# Implementation Services

## Basic Plant Set Up – \$4,800

### Everything needed to get a plant up and running

- Configure up to 50 basic alarm rules and assign recipients.
- Create an asset structure with up to 25 subassets from a PID or Excel template.
- Overlay live system data on actual HMI screenshots.
- Provide a holistic overview of processes or systems using charts, KPIs, gauges, tables, and widgets.
- Configure and integrate eWon, pull tags from the PLC, and import them into opsCTRL.
- Create up to 10 simple functions or calculations (e.g., statistical, lag, totalizer).
- Schedule up to 20 maintenance tasks for assets.
- Upload up to 10 PDFs (e.g., O&M manuals, troubleshooting guides).
- Digitize processes (e.g., Daily Rounds) into workflows.
- Set up two simple workflows for data entry.

## Advanced Plant Set Up – \$12,000

### Complete digitization package for connected plant operations

- Configure up to 50 basic alarm rules and assign recipients.
- Set up to 10 advanced alarms and assign recipients.
- Create an asset structure with up to 50 subassets using operational drawings or templates.
- Lay out live system data in a clean, custom design (quantity: 3).
- Provide a holistic overview using charts, KPIs, gauges, tables, and widgets (quantity: 3).
- Establish an edge connection, pull tags from an OPC server, and import them into opsCTRL.
- Develop one advanced function (e.g., membrane analytics).
- Create up to 10 simple functions or calculations (e.g., statistical, lag, totalizer).
- Schedule up to 20 maintenance tasks for assets (quantity: 2).
- Transform and import data into opsCTRL.
- Digitize processes (e.g., Daily Rounds) into workflows (quantity: 3).
- Set up two simple workflows for data entry.

# About inCTRL Solutions

# About inCTRL Solutions

## Who we are and what we do

**Best-in-class software solutions +  
Industry-leading process expertise =  
Intelligent operations**

- inCTRL combines best-in-class software with industry-leading water, wastewater, and biogas expertise.
- We empower operations teams to achieve resilient, efficient, and sustainable performance in ever-changing environments.

# About inCTRL Solutions

## Who we are and what we do

**inCTRL's key personnel bring more than 50 years of experience in the fields of optimizing municipal and industrial wastewater and biogas treatment processes.**

- inCTRL Solutions was created in 2012.
- Joined the **SKion Water** family in 2021.
- We work with utilities and suppliers of all shapes and sizes.
- We have hundreds of connected plants across the globe including United States, Canada, Europe, and Southeast Asia.

# About inCTRL Solutions

## PLATFORMS

- **opsCTRL Supplier:** Seamlessly connect equipment and customers to deliver real-time insights and enable smarter, more streamlined operations.
- **opsCTRL Facility:** Achieve real-time visibility into operations and processes to enable proactive decisions, improve efficiency, and maintain control.
- **SIMBA#:** Advanced modeling for water, wastewater, biogas, sewer networks, and receiving water bodies to optimize processes and improve efficiency.

## ADVANCED DIGITAL SOLUTIONS

- **Controller Performance Monitoring (CPM)**
- **Sensor Performance Management (SPM)**
- **Key Process Indicators (KPI) Suites**
- **Membrane Performance Management (MPM) Suite**
- **AI Sensors**
- **Digital Twins**
- **Advanced Control Solutions**
  - ABAC-SRT (Ammonia-Based Aeration Control-Sludge Retention Time)
  - MPC (Model Predictive Controllers)
